## DESIGN YOUR FUTURE

**Saint Kentigern College Y12 and Y13 Students and Parents are invited to attend a  
Financial Smarts seminar by Hannah McQueen, founder of enableMe.**

Senior students are in the midst of making big career and financial decisions, but don't understand how those decisions will affect them in the long-term. They have to be more strategic than their parents were, but they're not sure how to do it. Property ownership feels like an impossibility and financial security seems reserved for the wealthy.

Hannah wants to change that, and she's on a mission to equip them with the smarts and support to create a better start. Improving financial literacy is one thing, but financial success is about so much more than that, as Hannah explains in this video. <https://wi.st/2RrZF81>

That's why Hannah and her team have created equipMe Now, a 12-week, online course designed for senior high school students. It focuses on career planning, personal development, building emotional intelligence and understanding relevant financial strategies to create wealth faster.

This seminar will focus on the way the next generation plans for and secures their careers and financial futures. It shows them how to think, plan and execute in order to create the life they want.

Come along and learn how to create a better financial future for the next generation.
