

Purchasing a student device through the school device programme has many additional benefits that come with it.

Benefits of using a school device* include:

Ready and supported from day one

Saint Kentigern School devices are supported and set up prior to machine delivery to ensure students are ready for learning on their first day. With a school device, the machine will be connected to the local wireless network and a variety of network services, as well as ongoing support for both software and hardware issues.

No hidden costs

All general system and curriculum software are included in the computer configuration. Parent's are not required to buy additional curriculum or systems software for their child to use at school. The one-off software contribution fee of \$250 is charged to the student account.

Minimised downtime and interruptions to a student's learning

Onsite support technicians and engineers can resolve most issues on Saint Kentigern School devices with access to loan computers if the student device needs to be kept for servicing.

3 Year Manufacturer Warranty and Accidental Damage Protection included with every device

Enjoy stress-free warranty on Saint Kentigern School devices as the school's ICT department will process all warranty claims on behalf of the parent and students. All Saint Kentigern School devices have a 36-month manufacturer warranty.

Drawbacks of not having a school device* can be:

Device is not ready for school use

Devices not purchased through the Saint Kentigern's School Device program will not be set up and enrolled into the Saint Kentigern's learning environment for student learning and use.

Additional charges

There is a \$200.00 service charge to configure devices not purchased through the Saint Kentigern's School device program and install Saint Kentigern software/systems. Future configuration of the computer (including replacement devices) is chargeable.

No access to replacement or loan devices

Supply of a replacement computer will be the owner's responsibility while the computer is under repair. In the event of a machine failure, the owner is required to source a replacement machine to ensure that the student is not without a computer in class.

Owner's responsibility to secure comprehensive cover

It is the owner's responsibility to secure comprehensive cover for loss and accidental damage. Parents will need to ensure a quick turnaround for repair or replacement so that their child's learning is not affected.

*school device refers to a device purchased through Saint Kentigern and Cyclone School Device Programme.

Learn more and pick your student's device here.

Orders need to be placed before **13th November 2024** to prioritise delivery to **your home** before Christmas.

Orders made after this date will occur after the year-end holidays.
